

2x500KW LOADBANK FAMILY MALL SULEYMANIYE

Family Mall have 2,5MW (10x2500Kva) powered diesel generators, however generators on site was working with %30 capacity . While using 2x500KW loadbanks they save the gensets and increased the power usage.

Thanks to a detailed programming study of its control units, and after having subjected the units to multiple highly demanding tests, U POWER is able to guarantee of loadbanks.

Location:

Suleymaniye (Iraq)

Installed power:

10X2500 kVA= 25 MVA stand-by power

Installed Loadbank power:

2x500KW

Family Mall Suleymaniye, a world-class destination in Iraq celebrating the best in entertainment, retail and hospitality, has ensured the continuity of its power supply by installing generator sets that start up in record time in the event of a failure in the electricity grid a

Occupying 215,000 square metres in the very heart of the Iraq, Family Mall will be home retail shops, a large hypermarket operated by Carrefour, food court, cafes and VIP restaurants with the park view, ice skating, bowling, fitness center and indoor game areas and offices.

A rectangular shaped shopping gallery is connected to a central atrium with a glass dome roof. The atrium creates a visual connection between the shopping levels and brings natural light into the internal shopping corridors.
